The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payloads value. The available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.

S= standard O=optional MTS=multistrato VTR= Vetroresina

The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payloads value. The available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.

S= standard O=optional MTS=multistrato VTR= Vetroresina

The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.

S= standard O=optional MTS=multistrato VTR= Vetroresina

The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payloads value. The available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.

La massa del veicolo omologato comprende: conducente (75 Kg), serbatoio gasolio riempito al 100% (60 lt.), acque chiare riempito a 20 lt. (utilizzo della speciale valvola di scarico) e bombole gas in alluminio (max.15 kg.) piene al 90% della loro capacità, e tolleranza prevista in fase di omologazione (+/- 5%) (2007/46/CE). Tutto quanto non incluso nella versione standard del veicolo, sia cellula che chassis, comporta un aumento del peso in ordine di marcia con la conseguente riduzione del carico utile fino alla possibile riduzione di posti omologati in el caso il peso complessivo per il valore del carico utile disponibile. I carichi utili disponibili risultano dalla differenza tra massa massima ammessa e massa in ordine di marcia e prevedono una tolleranza del 5 %. In fase di acquisto è necessario verificare il peso degli optional che si intende installare sul veicolo.

The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.

The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.

The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payloads value. The available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.

The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.

The mass in running order includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and aluminium gas cylinders (max.15 kg) filled to 90% of their capacity, and tolerance specified in the type-approval (+/- 5%) (2007/46/EC). Anything not included in the standard version of the vehicle, both living unit and chassis, results in an increase in weight in running order with resulting decreased payload up to the possible reduction of approved seats in the case of the total weight for the available payloads value. The available payloads result from the difference between maximum permissible mass and running order mass and have a tolerance of 5%. During the purchase phase it is necessary to check the weight of the options to be installed on the vehicle.

### RIVIERA PACK

PACK CHASSIS		ХТ
PACK FIAT (required on Heavy chassis)	FOG LIGHTS – TRACTION+ – 16" ALLOY WHEEL RIMS WITH COMPOSITE SUSPENSION – BLACK GRILLE/SKID PLATE/ HEADLIGHTS – STEERING WHEEL CONTROLS – TWO–PART DOOR WITH WINDOW AND CENTRAL LOCKING – SOLAR PANEL – DOUBLE REAR–VIEW CAMERA WITH TRAVEL AND PARKING FUNCTION – PLEATED BLIND	<b>/</b>
PACK SELEKT FIAT*	AUTOMATIC TRANSMISSION	✓
PACK ELEGANCE FIAT*	TECHNO DASHBOARD – TPMS – LEATHER COVERED STEERING WHEEL AND GEAR LEVER KNOB	<b>✓</b>
PACK ELEGANCE PLUS FIAT*	TECHNO DASHBOARD – TPMS – FULL LED HEADLIGHTS – LEATHER COVERED STEERING WHEEL AND GEAR LEVER KNOB	<b>✓</b>
PACK EXTRA TECH FIAT**	FULL DIGITAL CLUSTER – AUTOMATIC CLIMATE CONTROL SYSTEM – ELECTRIC HANDBRAKE	<b>✓</b>

<sup>\*</sup> Fiat Pack mandatory for Fiat Selekt Pack and for one of the two Elegance Packs \*\* Fiat Pack and one of the two Elegance Packs mandatory for Extra Tech Fiat Pack

PACK TV		ХТ
PACK TV DIGIT	DIGITAL TV AERIAL – TV HOLDER – SMART TV 24''*	<b>✓</b>
PACK TV SAT	SATELLITE ANTENNA – TV HOLDER – SMART TV 24"*	<b>✓</b>
PACK TV WIFI	WI-FI ROUTER – TV HOLDER – SMART TV 24"*	<b>✓</b>

The masses indicated in this catalogue refer to the provisions of European Directive 2007/46/EC.

### MASS IN RUNNING ORDER

It includes the weight of the empty base vehicle, of the driver (75 kg), 100% of the fuel (60-l tank), fresh water (tank filled with 20 l while travelling), and a gas tank for living purposes (20 kg). The mass in running order, and consequently the payload and/or certified seats may vary depending on the accessories installed.

### **PAYLOAD**

This consists of the difference between the maximum technically permissible laden mass and the mass in running order. It includes elements for living purposes, the transported passengers defined by the manufacturer (driver excluded), and the personal effects.

The payload calculation is based on the following parameters: 75 kg for each passenger (driver excluded), 10 kg of baggage for each passenger and for the driver, 10 kg for each metre of length of the vehicle, plus the remaining payload, which can be used for the installation of accessories or for additional baggage.

All masses and loads of the empty vehicle have a tolerance of +/- 5%, in compliance with Directive 2007/46/EC.

Any optional equipment increases the mass in running order and decreases the payload.

The weight of non-standard accessories is not included in the mass in running order indicated in this catalogue. Additional accessories and devices reduce the payload by a quantity equal to their weight; the incidence of the weight of the individual accessories is shown in the special column in the technical data sheets or can be requested at our dealers. In case certain accessories are installed (for example, additional elements such as coupling device or motorbike rack), the mass of these accessories will affect the payload, possibly reducing it along with the number of certified seats. Please note that the law does not allow the maximum permissible mass to be exceeded, which can be consulted under the specific heading of the data sheets. Please make sure that the maximum loads on the axles and the maximum technically permissible load mass are not exceeded during the complete loading phase of the vehicle. The regulations and requirements of each country may entail changes in the characteristics of this table. The number of certified seats may vary depending on the traffic regulations in force in each country. When driving, the fresh water tank must be filled to a maximum of 20 litres.
